

Cow brush Easycleaner

Major characteristics:

- Oblique round brush Ø 80 cm. The large brush surface and the rotating brush movement are to ensure steady massage of the head, back and large parts of the flanks;
- The oblique brush position suits large and small animals alike. So, there is no need for any height adjustments;
- Compact construction to allow installation in confined spaces;
- Switches on automatically when the brush is touched by the cow;
- The fixed runtime is approx. 2 minutes
- The direction of rotation reverses automatically with every start-up. This is to ensure even "wear" of the brush;
- The brush switches off automatically and reverses the direction of rotation when the rotation resistance becomes too great, e.g. when the tail of the animal gets stuck. The rotation resistance is adjustable.

Technical data:

- Electromotor : 230 V, 50 Hz
- Motor power : 0.37 kW
- Rotational speed : 34 r.p.m.
- Required installation width : approx. 78 cm
- Weight : 67 kg
