Arena calf pens

A new-born calf. Those first few weeks are essential for growing into a healthy cow. Proper housing is a must in this respect. For many years, single pens have been the best solution for preventing contamination.

Spinder has now introduced plastic calf pens of the Arena model to their range of products. These calf pens are characterised by easy cleanability of walls and floors. The walls are smooth; so the dirt does not easily stick. The floor is made out of one piece, it is lightweight, and with little chance of curling straw. (It is recommended to house the calves on a decent layer of straw.)

Fitted with a handy and flexible front gate. The standard castor wheels allow the pens to be moved easily, so that cleaning can be carried out in the best possible way and in the right place.

The dimensions are in line with the latest insights: 91 cm x 150 cm or 101 cm x 160 cm.
